Subject: RE: New and Old documents to review

Kelly,

The comments have already gone out to FMC per my messages of last week. The groundwater sampling issues pertaining to when/where groundwater will be sampled are still being discussed. I will make that the issue for today's call.

I have not received a response from the Tribes on the FMC RD Work Plan comment response. That was due yesterday. I will be sending out my letter back to FMC for review today or tomorrow.

Kelly,

Per the message below, I have not heard back from the Tribes on their concerns about comments received from FMC on the Work Plan. If I do not receive anything by the end of the day tomorrow, I will prepare a response for FMC the way I did for their last set of responses, and include the requirement to address the comments from the Tribes that we do not think were adequately addressed.

Kevin

Subject: New and Old documents to review

- 1) As I previously asked, in order to be able to move forward on the Design Work Plan, I need the following by the end of the day on Tuesday December 3:
 - a) List of the responses from FMC that you do not agree with.
 - b) Brief response as to why or what the issue is.
 - c) A proposed resolution.

We will discuss these at our team meeting next week.

- 2) We now have the results of the Gamma Cap Test Plan. Please provide me with your comments by the end of the day December 17.

- 3) Bernie and I have reviewed the responses to FMC's groundwater comments and incorporated the comments we received from the Tribes. Attached is our draft response to FMC. I have included margin notes and responses to the Tribes comments. The final response will not include these notes. I plan on sending these out tomorrow. Please take a quick look.
